Let's find the right product.

Contact your dedicated Jehu sales representative for product information, pack quantities and current availability.

Product information compiled from the supplied Precision Point range table, category brochures and Ultra Pro packaging artwork. Images are not to scale. Follow the labelling and instructions supplied with each device; this brochure does not replace them.

Insulin syringes

A 1 ml insulin syringe range with two needle-size options and a choice of pack formats.

1 ml

THREE ORDERING OPTIONS

30G x 8 mm

29G x 12.7 mm

Two needle sizes

Choose between the listed 30G and 29G configurations.

Flexible pack formats

Pack-of-10 options and an individually blister-packed 29G option.

Product code	Capacity	Needle size	Presentation
PP00130GP	1 ml	30G x 8 mm	Sterile pack of 10
PP00129GP	1 ml	29G x 12.7 mm	Sterile pack of 10
PP00129GB	1 ml	29G x 12.7 mm	Individual blister

Check the product labelling for the insulin concentration and graduation scale before selection.

Premium pen needles

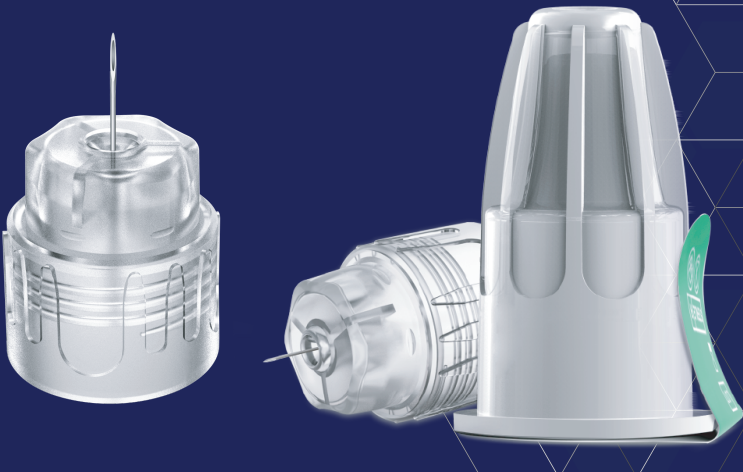

Sterile, single-use pen needles for subcutaneous administration of insulin or other injectable medication using a compatible pen injector.

Ultra Pro

THREE SIZE OPTIONS

30G x 8 mm
31G x 5 mm
32G x 4 mm

ORIGINAL PACKAGING ARTWORK

- 3-bevel comfort tip**

Three-bevel needle-tip design.
- Extra-thin wall**

Extra-thin-wall needle construction.
- Sterile & individually sealed**

EO-sterilised. Intended for one-time use.
- Pen compatibility**

Compatible with most major insulin pen devices; check the device instructions.

Product code	Gauge	Length	Per box
PP0030G8PN	30G	8 mm	100
PP0031G5PN	31G	5 mm	100
PP0032G4PN	32G	4 mm	100

Use only with a compatible pen injector. Refer to the supplied instructions for use and disposal.

GENERAL INJECTION RANGE

Luer slip syringes

Three-part syringes in four capacities, providing a straightforward range for clinical selection.

3-part construction.

Four capacities.

3 ml

5 ml

10 ml

20 ml

LUER SLIP CONNECTION

- Consistent format

All listed sizes use a three-part, luer slip configuration.

Capacity selection

3 ml, 5 ml, 10 ml and 20 ml options in one range.

Product code	Capacity	Construction	Connection
PP003MLS	3 ml	3-part	Luer slip
PP005MLS	5 ml	3-part	Luer slip
PP010MLS	10 ml	3-part	Luer slip
PP020MLS	20 ml	3-part	Luer slip

Contact your dedicated Jehu sales representative for pack quantities and current availability.

GENERAL INJECTION RANGE

Hypodermic needles

Two listed gauge and length combinations for professional clinical use.

18G materials
Stainless steel cannula with a polypropylene hub.

18G material exclusions
Free from DEHP, latex and natural rubber.

18G sterile presentation
EO-sterilised, single-use, non-pyrogenic and non-toxic.

Two size options
18G x 40 mm and 23G x 30 mm are listed in the range.

Product code	Gauge	Length
JPP4622	18G	40 mm
JPP700	23G	30 mm

Detailed material and sterility statements above apply to JPP4622 (18G) only.

Safety lancets

Pressure-activated safety lancets with a concealed, retractable needle and colour-coded size options.

Concealed needle

The needle is concealed before and after use.

Single-use safety design

Needle retraction prevents reuse.

Product code	Gauge	Incision depth	Colour
JISL21G	21G	2.2 mm	Orange
JISL23G	23G	1.8 mm	Green
JISL28G	28G	1.8 mm	Pink

Sterility: radiation sterilised. Latex-free status: No, as stated in the supplied product brochure.

NeoTouch

Gentle lancet for neonatal heel incisions, including preterm infants.

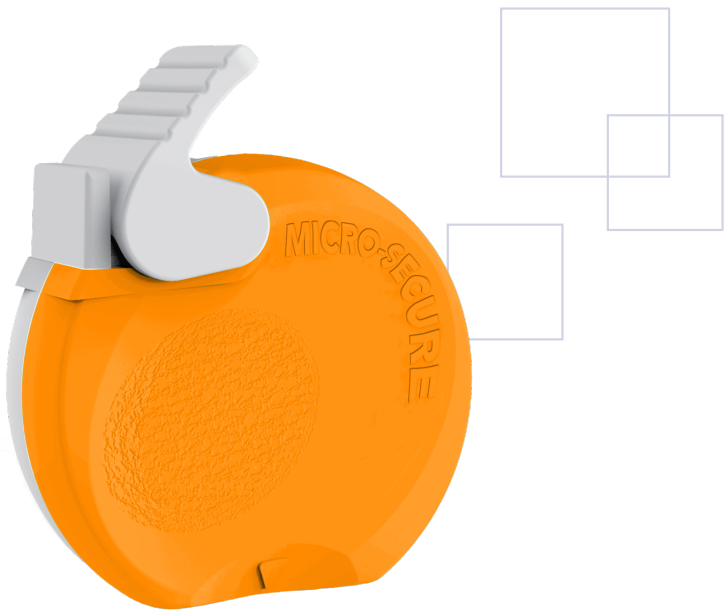

PREEMIE

0.85

mm incision depth

1.75

mm incision length

Controlled incision

Fixed 0.85 mm depth and 1.75 mm incision length.

Comfort grip & safety tab

Designed for stable handling and ease of use.

Product code	Size	Sterility	Per box
PP108575	Preemie	Sterile, single use	50

Also listed as MicroPremi 0.85 x 1.75 Heel Incision Device in the product range table. For professional use. Do not resterilise. Refer to the device instructions for use.

Precision Point™

Precision. Control. Confidence.
