"It always seems impossible until it's done."

Nelson Mandela

Across the world, millions of lives depend on our ability to prevent infection, preserve the effectiveness of antimicrobials, and advance safer healthcare practices.

The challenge of antimicrobial resistance belongs to all of us.

It is not the responsibility of a single hospital, organisation, profession, or country.

It is a shared fight.

The UNITE 2026 Summit exists to bring together those committed to protecting patients through innovation, education, and collaboration. By sharing expertise, embracing new ideas, and working together, we strengthen our collective ability to create lasting impact.

Every conversation, every partnership, and every action taken during this summit contributes to a future where patients receive safer care and better outcomes.

Because when we unite behind a common purpose, meaningful change becomes possible.

One World. One Humanity. One Fight.
