

New Product Portfolio 2026

Advanced Clinical & Surgical Solutions

This catalogue showcases our newest additions across essential clinical and surgical categories, including surgical masks, surgical gowns and securement solutions. Each product has been developed or sourced with a focus on safety, performance, and practical use in modern healthcare environments.

An ISO 13485 Accredited Company

Explore how Jehu Industries' cutting-edge medical devices are transforming healthcare delivery, setting new standards for innovation and patient well-being.

01

SUPPLY CHAIN EXPERTISE

Navigating the healthcare landscape requires balancing efficiency with top-notch care. At Jehu, we understand your challenges. We believe in smart cost practices without compromising exceptional healthcare. Our experts support you, acknowledging that quality care defines your service. We ensure affordability doesn't overshadow your value to patients. Jehu guides you in choosing the right products, aligning budget considerations with quality commitment. The outcome? Affordable healthcare on par with advanced systems. We champion equitable access to superior healthcare. Partner with Jehu for an efficient, patient-centered approach. Your dedication to healthcare excellence deserves Jehu's support.

02

INCREASE EFFICIENCY

- Easily accessible products increase productivity and efficiency amongst staff, thus increasing the quality of service to the patient.
- By providing correct pack sizes in specific working areas within a hospital will increase efficiency.
- We at Jehu Industries have the ability to reduce pack sizes which in return will decrease your stock holding value.

03

INFECTION PREVENTION CONTROL

With a keen focus on infection prevention, we've meticulously crafted over 90% of our products to align with rigorous standards. Our mission is to join hands with IPC, working collaboratively to effectively lower infection rates and combat hospital-acquired infections.

Enlist the expertise of our clinical resource specialists to delve into a diverse array of products. These solutions are strategically curated to establish and uphold a safer environment, ensuring the well-being of both patients and clinicians. From the initial entry into your facility all the way through the phases of post-recovery, our adept specialists are poised to assist you in selecting the most fitting solutions.

06

PLM PRODUCT LOGISTIC MOVEMENTS

As a dedicated and reliable partner, we deeply understand the intricate challenges that come with managing a hospital effectively. Your unwavering commitment to providing the utmost level of care to your patients is truly commendable and remains your primary objective. We recognize that the seamless flow of stock and the prevention of stock outages are crucial aspects that should never divert your attention from the core mission of delivering exceptional patient care. Leveraging our extensive expertise, we stand ready to handle the intricacies of forecasting and logistics, ensuring that your stock management processes remain streamlined and efficient. Jehu takes pride in offering a valuable service: inter-hospital stock transfers, all without any additional charges. This service can play a pivotal role in optimizing your stock distribution, allowing you to maintain consistent supplies across different hospital units. In a unique gesture of support, we also extend this service to encompass competitor products not within the JI product range, without incurring any fees.

05

PRODUCT MANAGEMENT

Our capabilities extend to providing you with a steady stream of insightful reports that delve into your ordering patterns and product performance. These reports are thoughtfully tailored to align with the unique trends exhibited by your hospital, taking into account its specific size and requirements. By harnessing the power of data, we empower you with a comprehensive overview of your usage patterns, meticulously tracking not only the quantities consumed but also expiration dates to ensure the utmost safety and compliance. Additionally, our vigilant monitoring extends to detecting any instances of product misuse, enabling you to address potential issues proactively and minimize associated risks.

04

OEM MANUFACTURING

Recognizing the distinctiveness of your hospital's operations, it's imperative to collaborate with a company that truly comprehends the intricacies of your system. Your requirements demands a solution that seamlessly aligns with your specific needs, all while upholding the highest standards of patient care. At Jehu, we present a tailored solution through our OEM program, a pathway that empowers you to design a product that's custom-fitted to your exact specifications. This approach ensures that the product not only integrates harmoniously within your hospital's workflow but also preserves the quality of care that your patients deserve. Our commitment ensures that this customization doesn't translate into excessive costs. Your vision, combined with our knowledge, will pave the way for a solution that is a perfect fit for your hospital's operations, enhancing efficiency and patient outcomes.

Foley Securement Device

Product Code: JI10000

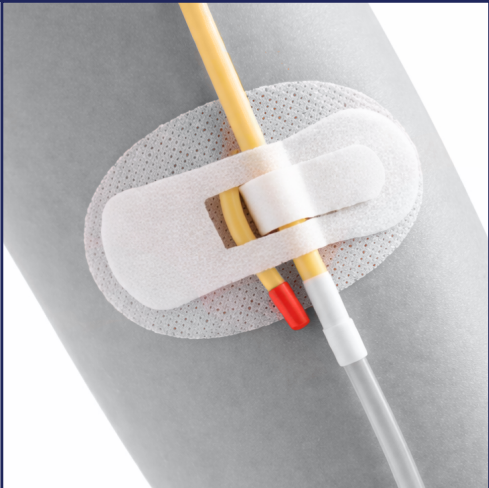

The Foley Catheter Securement Device is a sterile, single-use medical device designed to safely and effectively stabilize indwelling urinary catheters. It helps prevent catheter movement, displacement, and inadvertent removal, reducing the risk of urethral trauma, irritation, and infection associated with catheter migration.

The device secures the foley catheter to the patient’s skin using a gentle yet reliable fixation system that accommodates natural body movement while maintaining catheter stability. Its design supports patient comfort, minimizes skin irritation, and promotes safe, consistent urinary drainage in clinical and long-term care settings.

Manufactured from medical-grade materials, the Foley Catheter Securement Device is suitable for use in hospitals, clinics, and home-care environments where catheter management is required.

Key Clinical Benefits

- ✓ Suture-free securement
- ✓ Gentle, hypoallergenic adhesive
- ✓ Breathable non-woven base
- ✓ Sterile and single-use
- ✓ Compatible with standard foley catheters
- ✓ Provides stable, comfortable fixation

Technical Specifications

Material	Medical-grade polymer and skin-friendly adhesive components
Sterility	Sterile, single use
Compatibility	Suitable for standard foley catheters
Packaging	Individually packaged in sterile protective wrapping

Important

- Store in a cool and dry place
- Do not use if packaging is open or damaged
- For single use only

Level 3 Surgical Mask

Antifog Foam With Ties

Product Code: JI8000

Our Level 3 surgical mask is engineered for maximum protection and comfort in clinical environments. Featuring a multi-layer construction, it combines a wet-laid outer layer, meltblown filter, and soft inner layer to provide excellent bacterial filtration and fluid resistance.

The mask is equipped with an antifog polyester foam nose piece for clear visibility, an adjustable aluminium nose strip for a secure fit, and soft, durable ties to keep it comfortably in place throughout extended use.

Designed for healthcare professionals, this mask offers reliable performance while prioritizing comfort, breathability, and safety.

Key Clinical Benefits

- ✓ Bacterial Filtration Efficiency >98%
- ✓ Breathing Resistance <59 Pa
- ✓ Splash Resistance 120 mmHg
- ✓ Classification EN14683 Type IIR, ASTM F2100 Level 3
- ✓ Integrated anti-fog foam
- ✓ Durable 3-ply protection

Technical Specifications

Material	Wet-laid outer, spunbond PP & meltblown filter, ES inner, aluminum nose, blue foam, ties.
Sterility	Nonsterile, cannot be sterilised.
Compatibility	Suitable for use in all clinical, surgical, and general healthcare settings.
Packaging	Shipping case of 100 units. 25 units per dispenser, four dispensers per case.

Important

- Store in a cool, dry place away from heat.
- Keep products in dispenser and shipper boxes until use.

Level 3 Surgical Mask

Antifog Foam With Earloops

Product Code: JI8001

The Level 3 Surgical Face Mask with anti-fog foam and earloops is designed to provide maximum protection, comfort, and clarity in clinical environments.

Featuring a high-performance 3-ply construction with ≥98% bacterial and particle filtration efficiency, it offers superior fluid resistance while maintaining breathability for extended wear. The integrated anti-fog foam strip creates a secure seal along the nose, reducing air leakage and preventing eyewear fogging, while the adjustable nose bridge ensures a customised fit.

Soft, elastic earloops enhance comfort and stability, making this mask ideal for surgical, dental, and general medical use.

Key Clinical Benefits

- ✓ Bacterial Filtration Efficiency >98%
- ✓ Breathing Resistance <59 Pa
- ✓ Splash Resistance 120 mmHg
- ✓ Classification EN14683 Type IIR, ASTM F2100 Level 3
- ✓ Integrated anti-fog foam
- ✓ Durable 3-ply protection

Technical Specifications	
Material	Wet-laid outer, spunbond PP & meltblown filter, ES inner, aluminum nose, blue foam, loops.
Sterility	Nonsterile, cannot be sterilised.
Compatibility	Suitable for use in all clinical, surgical, and general healthcare settings.
Packaging	Shipping case of 100 units. 25 units per dispenser, four dispensers per case.

Important

- Store in a cool, dry place away from heat.
- Keep products in dispenser and shipper boxes until use.

Level 3 Surgical Mask Fluid Repellent With Visor

Product Code: JI8002

Our Level 3 surgical mask with integrated visor is designed to provide comprehensive protection for healthcare professionals. It features a multi-layer construction with a fluid-repellent outer layer, meltblown filter, and soft inner layer for superior bacterial filtration and resistance to splashes.

The built-in clear visor shields the eyes and face from droplets, while the adjustable aluminium nose strip ensures a secure, comfortable fit. Soft, durable ties allow for easy adjustment and prolonged wear without discomfort.

Combining advanced safety features with comfort and breathability, this mask is ideal for clinical environments where enhanced protection is essential.

Key Clinical Benefits

- ✓ Bacterial Filtration Efficiency >98%
- ✓ Breathing Resistance <59 Pa
- ✓ Splash Resistance 120 mmHg
- ✓ Classification EN14683 Type IIR, ASTM F2100 Level 3
- ✓ Integrated anti-fog foam
- ✓ Fog-free visor

Technical Specifications

Material	Wet-laid outer, spunbond PP & meltblown filter, ES inner, aluminum nose, blue foam, ties.
Sterility	Nonsterile, cannot be sterilised.
Compatibility	For standard surgical and procedural use where moderate fluid protection is required.
Packaging	Shipping case of 100 units. 25 units per dispenser, four dispensers per case.

Important

- Store in a cool, dry place away from heat.
- Keep products in dispenser and shipper boxes until use.

Reinforced Surgical Gown

Prem-soft Surgical Gown (Reinforced)

Designed for long-duration surgical procedures with high fluid exposure. Manufactured from hydrophobic non-woven SPUNLACE material, the gown offers enhanced protection, comfort, and durability in demanding operating room environments.

The reinforced critical zones provide additional barrier protection while maintaining breathability and flexibility, supporting clinician comfort during extended procedures.

Key Clinical Benefits

- ✓ Complies with EN 13795:2022 requirements for surgical gowns
- ✓ Meets AAMI PB70 Level 3 barrier performance standards
- ✓ Reinforced design for high fluid and long-duration surgeries
- ✓ Made from hydrophobic non-woven SPUNLACE material
- ✓ Soft, breathable, and comfortable for extended wear
- ✓ Suitable for use in operating theatres and sterile environments

Intended for use by healthcare professionals during surgical procedures requiring moderate to high fluid barrier protection (AAMI Level 3). The gown helps protect both the patient and medical staff from contamination, microorganisms, and fluid exposure.

Technical Specifications

Product Code	Size	Colour	Barrier Level	Sterilization	Packaging
J17000	M	Blue	AAMI PB70 Level 3	SMS (Spunbond–Meltblown–Spunbond), latex-free	1 pc / sterile bag
J17001	L	Blue	AAMI PB70 Level 3	SMS (Spunbond–Meltblown–Spunbond), latex-free	1 pc / sterile bag
J17002	XL	Blue	AAMI PB70 Level 3	SMS (Spunbond–Meltblown–Spunbond), latex-free	1 pc / sterile bag
J17003	XXL	Blue	AAMI PB70 Level 3	SMS (Spunbond–Meltblown–Spunbond), latex-free	1 pc / sterile bag

Important

- Store in a cool and dry place
- Do not use if packaging is open or damaged
- For single use only
